IMPORTANT INFORMATION

You must carefully inspect all items to ensure they are correct and no damage has occurred in transit.

Keep all packaging aside until the installation has been completed. If damage has occurred or there are clear defects visible, do not proceed with the installation. You need to contact Fontaine Industries immediately and provide images of the defects.

Installing the product will deem that you have accepted the product and its condition; installation will void any damage or defect claim.

BEFORE INSTALLING

Fontaine Industries recommends using a qualified tradesperson to complete your installation to ensure your products are installed to relevant building codes, Australian standards and to maintain your product warranty.

MAINTENANCE

This product should not be cleaned using abrasive materials or cleaners. To maintain the finish on your shower head use a soft cloth or weak solution of non-abrasive detergent.
Do not use corrosive or abrasive cleaning products containing acids or scouring products. Bleaches can also discolour products and therefore should not be used.

Damage caused by any improper treatment is not covered by warranty. Visit our website for full warranty and further details on exclusions.

LUXOR SHOWER HEAD

INSTALLATION

# LUXOR SHOWER HEAD
INSTALLATION

⚠ **All plumbing installations that require a pipe fitting must be carried out by a licensed plumber.**

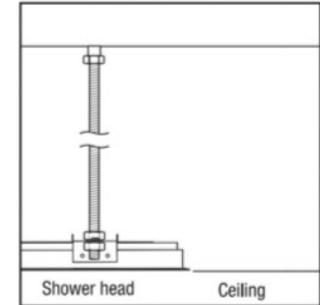

Install the mounting bracket into a timber frame inside the ceiling with screws.

2

Connect the shower hose to the water supply and test for leaks.
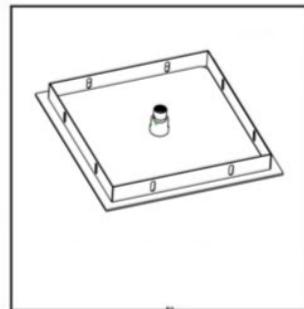

4

Shower head　　Ceiling

Using the mounting bracket as a guide, measure and mark the cutout for the shower head on the ceiling. Cut out the hole in the ceiling for the mounting bracket to be placed inside the cutout from the bottom.

1

Place the Luxor Shower Head inside the bracket from the top down.

3

Installation finished, enjoy your shower.
