modular vanity

CREATE YOUR OWN CUSTOM VANITY

The Teseller Modular Vanity series can help you design your very own custom vanity.

The modular cabinets have been designed to be put together to create your own bespoke vanity cabinet, but without the bespoke (hefty) price tag.

The series has endless combinations that can be utilised to achieve the most common sizes and configurations. This makes it perfect for creating a cohesive renovation with matching bathrooms throughout the house.

The vanity benchtop has no basin or tap holes pre-drilled, this way you are able to customise it however you wish. You can have two basins or one, wall taps or bench taps. Keep in mind you will need to add the holes as required depending on your configuration.

You can choose a solid timber top and enjoy its personality and warmth for years to come. The hardwood timber is coated with a satin finish to accentuate the wood grain whilst also sealing it. Alternatively you can choose a quartz stone top for its unrivalled durability and abundant colour options.

Our modular cabinets are constructed and are ready to be installed. The cabinet carcasses are designed to be fixed to one another, and then mounted on the wall. To complete the look, place your selection of benchtop and basins to finish off your dream vanity suite.

CABINET 900MM
MOD-1004

We have curated a selection of our most popular basins and made them available within the set, so you can choose with confidence and help you to complete your custom designer vanity unit.

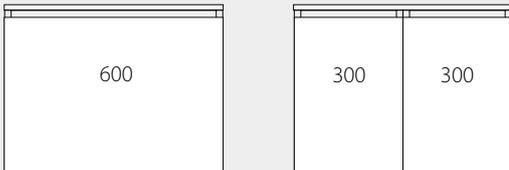

We recommend using only one basin for vanity under 1350mm so that there is enough free bench space remaining. For larger vanities such as the 1500mm or 1800mm size, there is more than enough bench space to have a twin set of basin and still have ample space left over for you to utilise on your busy mornings or relaxing night time routine.

When it comes to choosing your basin, although we have suggested the most popular basins for your modular vanity, you can also choose from our extensive range of counter basins. Due to the generous size of the vanity and its countertop, there are many options to choose from - the possibilities are endless!

If you have another basin or countertop in mind, ask us about suitability and our team can work with you to help you create the vanity perfect for you.
