This streamlined shower grate is made from brass and is designed to be installed in showers with a tile base. This waste has a reversible insert, you can choose to have it as a brushed finished or as a tile insert. When used with the tile insert, the floor tile can be set into the top piece to create a near invisible style. The central drain outlet includes a built-in catcher which helps prevent items from being lost down the drain and to reduce blockages caused by hair. A handy tool is included to make lifting the insert from the base easy and damage free.

Available in a brushed gold, brushed nickel and gun metal finish to suit your overall style. The compact 100mm length makes this shower grate ideal for smaller areas, or when you want the grate to be discreet.

Installed with the correct fall, this can make wet areas around in you shower safer and easier to maintain.
