The 600mm Stratford square fluted bathroom vanity has been thoughtfully designed to bring a new level of luxury in a compact size. Our square fluted cabinets have been handcrafted with a unique panelling façade on the exterior. Featuring a compact, fluted design, these wall-hung units are ideal for ensuites and main bathrooms alike. By freeing up floor space, they provide an airy, high-

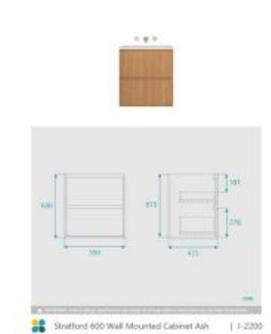

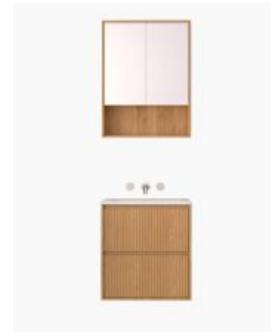

end feel in any bathroom layout.

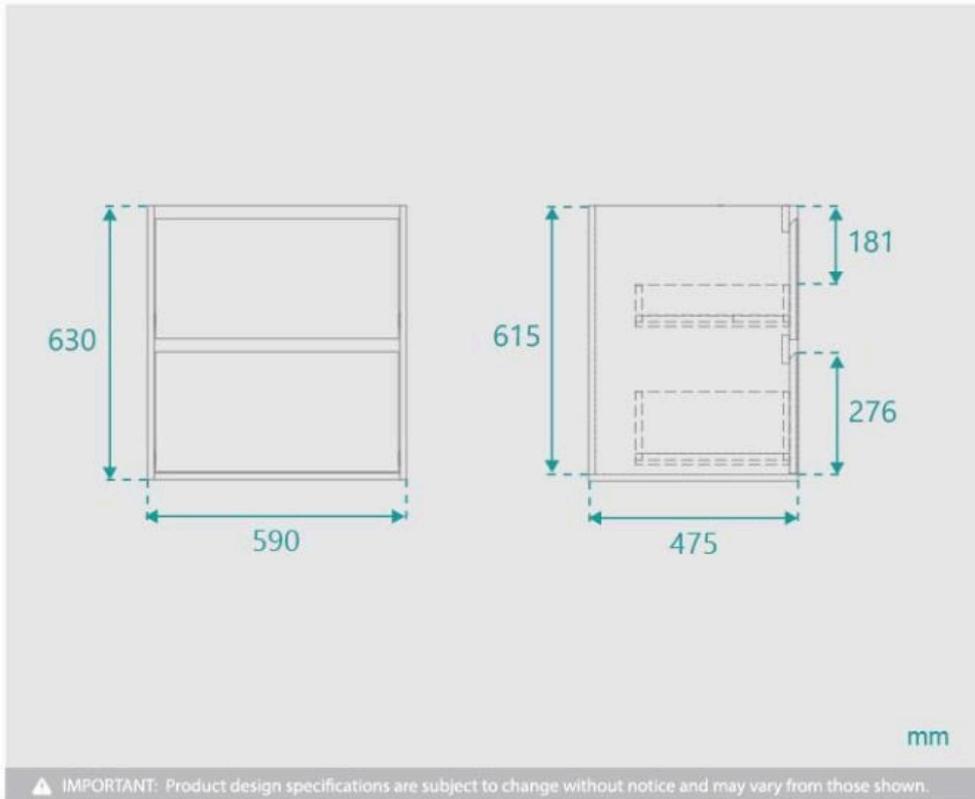

The exterior of the vanity is clad in natural wood grain, making this fluted vanity an exceptional value for price. The Stratford vanity unit can include an undermounted basin that sits under a range of stone options.

With two pull to open drawers on the main draw face, no space is wasted in this premium compact vanity that will assist with your everyday bathroom needs. Constructed in moisture resistant plywood then veneered with natural ash, bringing a calming and opulent style to your home.

Please note that stone and timber samples may differ from the actual product due to natural variations and batch differences. Colours displayed online may appear different due to screen settings. Standard stone and timber benchtops are supplied without holes, allowing for installation flexibility unless you choose to add tap and waste hole options to your order when selecting your benchtop. For ceramic products, specifications must allow +/- 10 mm tolerance for manufacturing variance, it is recommended to use measurements of the actual product received.*

***This hole cutting service is exclusively available with Fontaine's benchtop products only. If your benchtop is in stock, the lead time for this service is 5 business days, please add an additional 5 business days to the estimated arrival date (ETA) for out of stock products. We will provide general recommendations for standard tap hole and waste positions to ensure compatibility with your vanity. Custom positions can be accommodated; however, please be aware that the buyer will be responsible for any discrepancies, as Fontaine cannot be held liable for issues arising from custom placements. A template will be provided for your approval before we proceed with the hole cutting process. Once approved, the cutting positions will be final. This service is classified as a special order, Fontaine cannot accept returns or refunds for any benchtop services or products once the templates have been approved and signed off.*
