The in-wall or concealed cistern Pasadena suite is the most premium in the Pasadena range, and will result in the most superior high-end look once installed. The hidden flush creates an uncluttered, hotel like luxury that can also make the space feel bigger. The in wall cistern is available in various button options to perfectly match with the rest of your bathroom design.

Featuring a streamlined design, gloss white finish and a pan that is floor standing. At the convenience and simplicity of no rim, the rimless toilet makes for a significantly easier clean inside the pan. With a direct flush technique, the flush washes the entire pan more efficiently stopping the build-up of grime, bacteria and limescale that would be found in toilets with a rim. The concealed cistern means there is no space behind the pan or around the cistern for dust and grime to accumulate, making cleaning the exterior of the toilet a lot easier.

P Trap - 180mm

S Trap - 90-150mm P to S Trap converter (included)

See item image for specification information

* inwall cisterns, valves, seats, button assembly, links, flush pipes and other internal components which carry a 3 year replacement warranty.

Hygiene
Rimless rim allows for a superior flush as the entire rim is exposed to the flushing water, ensuring the rimless design stays clean & hygienic.

Quality Flushing
The inner surface of the toilet pan is specially coated with a special glaze that allows for more effective flushing & reduces the chance of grime & bacteria.

Soft Close
A soft close seat will allow the seat to close smoothly when you are finished, preventing any noise or damage to the seat & cover.

User Friendly
Equipped with dual release systems that allow the seat to be raised from either side of the toilet.

Easy To Clean
The rimless design has been specifically designed to resist dirt, grime, mould & odours. The smooth surface is easy to clean ensuring a pristine looking toilet that never gets old.

Water Efficient
The rimless and rimless dual flush system also allows you to adjust the amount of water used per flush to help reduce water usage while providing efficient flushing.
