The Teseller Modular Vanity series can help you design your very own customised vanity. The modular cabinets have been designed to be put together to create your own bespoke vanity cabinet, but without the bespoke price tag!

The series has endless combinations that can be utilised to achieve the most common sizes and configurations, perfect for creating a cohesive renovation with matching bathrooms throughout the house.

Our modular cabinets are constructed and are ready to be installed. The cabinet carcasses are designed to be fixed to one another, and then mounted on the wall. To complete the look, place your selection of benchtop and basins to finish off your dream vanity suite.

The benchtops listed have no waste or tap holes drilled in them, this way you are able to customise the placement of the basin to best suit the installation, basin type and/or tap type, this way you can be inspired to create and achieve your perfect vanity.

We have curated our most popular basins and made them available here, so you can choose with confidence and help you to complete your custom designer vanity unit.

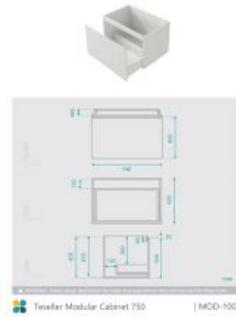

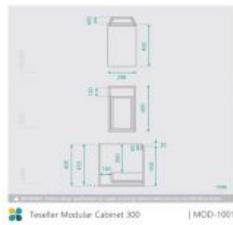

To view the Teseller possible combinations sorted by size, click on the [Product Attachments](#) tab to view the PDF document.

View our store to find the perfect tapware and waste to complete your look.

Please note that stone and timber samples may differ from the actual product due to natural variations and batch differences. Colours displayed online may appear different due to screen settings. Standard stone and timber benchtops are supplied without holes, allowing for installation flexibility unless you choose to add tap and waste hole options to your order when selecting your benchtop. For ceramic products, specifications must allow +/- 10 mm tolerance for manufacturing variance, it is recommended to use measurements of the actual product received.*

***This hole cutting service is exclusively available with Fontaine's benchtop products only. If your benchtop is in stock, the lead time for this service is 5 business days, please add an additional 5 business days to the estimated arrival date (ETA) for out of stock products. We will provide general recommendations for standard tap hole and waste positions to ensure compatibility with your vanity. Custom positions can be accommodated; however, please be aware that the buyer will be responsible for any discrepancies, as Fontaine cannot be held liable for issues arising from custom placements. A template will be provided for your approval before we proceed with the hole cutting process. Once approved, the cutting positions will be final. This service is classified as a special order, Fontaine cannot accept returns or refunds for any benchtop services or products once the templates have been approved and signed off.*
