The Lyndon single heated towel range features a sleek round design with a broad rail face, creating a luxurious statement in your bathroom space. The modern heated towel rail is available in a range of colour options including chrome, brushed gold, brushed nickel, matte black and gun metal to suit your desired bathroom fixtures and finishes. The single towel rail measures at 650mm, perfect for compact bathrooms or ensuites that require a space saving solution. This heated towel rail includes a transformer that optimises energy efficiency, ensuring your towels are left warm whilst minimising power consumption. Constructed from stainless steel for durability and can be installed wall mounted to your bathroom space. The heated bathroom towel rail is low maintenance and is easy to clean and presents an optimal warmth to keep your bathroom towels dry. These towel rails can be designed to be installed in a series of rails, creating a towel ladder look. This rail is particularly effective when installed in multiples, providing ample heated surface area for towel drying. For busy bathrooms, we recommend installing multiple towel rails to increase efficiency to your daily routine.
